

Food flows between counties  
Averaged across directions  
Row-Normalized

Inverse-square distances between counties  
Row-Normalized

Row normalized, weighted sum of the above two:  
Row-normalized inverse-square distances weighted by 0.95  
Row-normalized food flows weighted by 0.05

Difference between:  
row-normalized weighted sum  
row-normalized inverse square distances  
Increases are green. Decreases are blue.
